## Abstracts

An explosion-proof motor starter is a device specially designed for starting and controlling motors in hazardous environments. These starters have a special explosion-proof design that prevents explosions caused by sparks or high temperatures in hazardous environments such as flammable gases, steam, liquids and dusts. Explosion-proof motor starters usually use explosion-proof housings and sealing designs to prevent external harmful substances from entering the interior, and use special materials and construction to reduce the risk of sparks. They can be used in oil, natural gas, chemical, pharmaceutical, mining and other industries to ensure the safe operation of electric motors in hazardous environments. The explosion-proof motor starter market is growing along with the expansion of the explosion-proof motor market. Explosion-proof motor is a special motor used in flammable and explosive places.
