Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Explosive Trace Detection (ETD) Systems competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Explosive Trace Detection (ETD) systems are advanced security technologies designed to detect trace amounts of explosive materials. These systems are used in various environments, including airports, government buildings, and other sensitive locations, to enhance security and prevent potential threats from explosives. The primary objective of ETD systems is to enhance safety and security by detecting explosives before they can be utilized in malicious activities. Their deployment helps prevent acts of terrorism, trafficking of explosive materials, and other security threats. North America is expected to dominate the market. It has a leading position in aviation security, with a vast airport network and high air traffic. ETD systems play a vital role in preventing explosives from being carried onto airplanes. In addition, protecting the border from illegal activities such as smuggling is also an important application scenario. Europe has a mature market. With high security awareness, European countries have a strong demand for ETD systems, especially in the fields of aviation security and border control. Stringent regulations also promote the development of the ETD market. Asia-Pacific is a region with rapid growth. Countries such as China and India have a large population and are in the process of rapid urbanization. The increasing demand for public safety and the upgrading of security equipment in important places such as airports and railway stations drive the growth of the ETD market.

The global Explosive Trace Detection (ETD) Systems market size was estimated at USD 2451.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 7.40% during the forecast period.
