Abstracts

Exposed Fastening Panel is a metal panel system for building envelopes where fasteners (such as screws) pass directly through the panel and are exposed. The panels are typically made of galvanized steel, aluminum, or other corrosion-resistant metals, and can be coated with color coatings or other protective materials to enhance aesthetics and durability. Exposed Fastening Panels are widely used in commercial, industrial, and residential buildings due to their simple installation, low cost, and adaptability. The system is designed so that fasteners can be fixed directly to the supporting structure, ensuring efficient installation speed and stable performance, while achieving a combination of function and beauty through a variety of color, texture, and corrugation style options.
