Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Extendable Snow Shovel competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of telescopic snow shovels was estimated at 5-8 million units, with an average selling price of approximately \$15-\$25 per unit and a gross profit margin of about 45%. Single-line production capacity was approximately 250,000-350,000 units per year. A telescopic snow shovel is a type of snow shovel that achieves portability and adaptability to different user heights primarily through an adjustable-length handle. Its core feature lies in its telescopic handle mechanism, which is typically designed to strike an optimal balance between portability and user comfort. The upstream supply chain for telescopic snow shovels mainly consists of suppliers of high-performance engineering plastics, aluminum alloy tubing, and precision locking components; the midstream encompasses core production stages such as injection molding, metal finishing, telescopic mechanism assembly, and reliability testing; and the downstream reaches users through channels such as auto parts stores, outdoor equipment retailers, and emergency supplies procurement platforms. The demand fundamentally stems from modern users' dual pursuit of efficiency and portability in snow removal tools: on the one hand, replacing traditional snow shovels to meet the functional upgrade needs of efficient snow removal at home; on the other hand, meeting the rigid requirements of compact storage in in-vehicle emergency scenarios, forming a growth model driven by "functional replacement + scenario expansion."

The global Extendable Snow Shovel market size was estimated at USD 140.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.
