Report Overview

An Extended Range Electric Vehicle (EREV) is a type of hybrid vehicle that combines an electric motor with an internal combustion engine (ICE) to extend its driving range and reduce the reliance on gasoline or diesel fuel. EREVs are designed to operate primarily on electric power, using electricity stored in a battery pack to propel the vehicle. When the battery's charge is depleted, the internal combustion engine acts as a generator to produce electricity to power the electric motor or directly drive the wheels, thereby extending the vehicle's range.
