Report Overview

Exterior Insulation and Finishing System (EIFS) is an insulating, decorative, and protective finish system for exterior walls that can be installed on any type of construction. It is the only exterior wall covering that insulates and provides weather protection in a selection of shapes, colors, and textures that can replicate almost any architectural style or finish material, or stand by itself as an architectural finish. EIFS is wall cladding that utilizes stiff insulation boards on the outside of a wall and a plaster-like exterior covering. EIFS employs organic polymeric finishes reinforced with glass mesh. EIFS can be effective for both new construction and recladding applications, as an energy-efficient, economical wall covering. After World War II, buildings throughout Germany were damaged and in need of resurfacing. EIFS originated in Germany and came to the U.S. in the late 1960s.
