## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on External Rotor EC Fans competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. External Rotor EC Fans are high-efficiency air-moving products driven by an External Rotor Electronically Commutated (EC) Motor. The rotor of the motor is located on the outside, and the impeller is directly mounted onto it, forming a compact integrated structure that saves installation space, enhances heat dissipation, and ensures smooth operation. With electronic commutation technology replacing traditional brushes, EC fans provide intelligent variable-speed control, low noise, high efficiency, and extended service life. In 2024, global External Rotor EC Fans production reached approximately 16833 K units, with an average global market price of around US\$ 87 per unit. Upstream raw materials for External Rotor EC Fans mainly include metals, permanent magnets, electronic control modules, and plastic components. Motor housings and stators are typically made of cold-rolled silicon steel, stainless steel, and aluminum alloys, supplied by Baosteel, Nippon Steel, and ArcelorMittal. The magnetic assemblies use high-performance NdFeB magnets from Shin-Etsu Chemical and Zhong Ke San Huan. Key power electronics, sensors, and MOSFETs are sourced from Infineon, STMicroelectronics, and Texas Instruments. The impellers and housings are usually made from glass-fiber-reinforced PBT or PA66 materials, provided by BASF, SABIC, and Covestro. Raw materials account for roughly 60% of the total product cost, with the control electronics and magnet components being the most price-sensitive. Downstream applications are extensive, covering HVAC, Refrigeration and Cold Chain Equipment, Electronics and Telecom Cooling, and Industrial Ventilation and Machinery Cooling. The major clients including Daikin, Carrier, Gree, Midea, Emerson, BITZER, Haier, and GEA Group, etc. The gross profit margin of External Rotor EC Fans

is notably higher than that of conventional AC fans. The industry average ranges between 25% and 45%.

The global External Rotor EC Fans market size was estimated at USD 1464.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the forecast period.
