Abstracts

Extinguishing agents are substances used to suppress or extinguish fires. They work by interrupting the fire triangle, which consists of heat, fuel, and oxygen. These agents can cool the fire, remove oxygen, or inhibit the chemical reactions that sustain combustion. Common examples include water, foam, dry chemicals, and carbon dioxide. The selection of an extinguishing agent depends on the type of fire, as different agents are effective against various classes of fires, such as those involving combustible solids, flammable liquids, or electrical equipment. Modern trends emphasize environmentally friendly agents. The extinguishing agents market is relatively fragmented. The competitive landscape remains dynamic, with growth opportunities in segments where fire safety infrastructure is still developing and in emerging markets. Tyco Fire Products, Perimeter Solutions, 3M, Linhai Limin Chemical, and Amerex Corporation are the major suppliers in the global fire extinguishing agent market. CR5 accounts for approximately 17.36% of the global market. Based on the product type, the Extinguishing Agents is primarily split into Dry Chemical Extinguishing Agents, Foam Extinguishing Agents, Gas and Other Extinguishing Agents. Solid fires are mainly extinguished using dry powder and foam fire extinguishing agents. Since foam fire extinguishing agents are cheaper, they have the highest market sales and are the best-selling fire extinguishing agents. Foam Extinguishing Agents was the most widely used type which took up about 38.32% of the global market. Extinguishing Agents has wide range of applications, such as Industrial, Maritime, Commercial, Public Sector. The global extinguishing agents market has experienced steady growth, driven primarily by increasing industrialization and heightened awareness of fire safety regulations across key sectors. The industrial sector remains the largest application area, fueled by the expansion of manufacturing, energy, and chemical industries, which require robust fire suppression systems to mitigate risks associated with high-value assets and hazardous environments. Stringent safety standards and the need to protect infrastructure investments have further

accelerated demand, particularly in regions undergoing rapid industrial development. And Industrial was the most widely used area which took up about 34% of the global market.

The global Extinguishing Agents market size was estimated at USD 1931.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
