## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on F-Class High-Precision Scope competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. F-class, a long-range shooting competition, is named after its founder, Canadian George Farquharson who made a tremendous impact on target shooting. In the mid to late 1990s, he reached an agreement with the Dominion of Canada Rifle Association to allow the use of bipods and scopes in addition to slings and iron sights in competitions. In F-class, the competitors shoot at targets 300-1000 m away in the prone position. The goal is to shoot tight groupings of 15-20 shots as close to the center as possible. The F-class high-precision scope can play a professional auxiliary role for the F-class.

The global F-Class High-Precision Scope market size was estimated at USD 110.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
