Abstracts

Fabric Laser Engraver is a specialized machine that uses a focused laser beam to engrave or etch intricate designs, patterns, logos, or textures onto the surface of fabric materials. Unlike a laser cutter, it does not cut through the fabric but instead modifies the top layer to create detailed surface effects without damaging the material. It is commonly used in applications such as custom branding, decorative textiles, and personalized designs for apparel, home textiles, and accessories. The machine offers high precision and the ability to produce fine, intricate designs with minimal material waste.

The global Fabric Laser Engraver market size was estimated at USD 754.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.90% during the forecast period.
