Abstracts

Face mask vending machines are automated retail units designed to dispense disposable or reusable face masks, often along with complementary hygiene products such as hand sanitizer or sanitizing wipes, in exchange for cash, card, or contactless payment. These machines are typically deployed in high-traffic public or semi-public locations?such as airports, hospitals, shopping malls, transit hubs, corporate offices, and educational institutions?to provide convenient, on-demand access to personal protective equipment (PPE). The core value proposition centers on hygiene accessibility, reducing human contact in transactions, and supporting public health compliance, especially in environments where mask usage is encouraged or mandated.
