Report Overview

A fantasy game refers to a type of video game, which is often played using the internet, and where a player can control the actions of a character in an immersive and well-defined virtual world or assemble virtual teams to play a game. Players need to download applications for any particular game that they wish to play. These applications are available on several gaming platforms such as Google Play Store and Apple App Store. Once downloaded to a desired smart device, players can follow the gaming instructions to commence the game. A game character or characters need to be defined by players to start the game. The game can be in a story format where a new virtual world is created in the game, or it can be a simple game or sport to be played among players. Players get points as they complete tasks or win games. These points are further used to add components to the game to enhance the experience of the game. Players can purchase the game components as well.

The global Fantasy Game App market size was estimated at USD 29950 million in 2023 and is projected to reach USD 84398.07 million by 2032, exhibiting a CAGR of 12.20% during the forecast period.
