Abstracts

Protein-free Rapid Blocking Solution is a ready-to-use, efficient and rapid blocking solution for western blot experiments. The blocking time is only 10 minutes, and the effect is better than traditional blocking solutions such as skim milk powder, BSA, casein, etc., simplifying the western blot protocol. Blocking with Rapid Blocking Solution can prevent non-specific binding during antibody detection, but allow specific detection. Compared with traditional blocking solutions, there is a higher signal, lower background value, and higher signal-to-noise ratio.

The global Fast Protein-free Blocking Buffer market size was estimated at USD 457.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
