Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Fasteners for Structural Steel Construction competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Fasteners for Structural Steel Construction production reached approximately 939 K Tons, with an average global market price of around US\$ 2100 per ton. Fasteners for Structural Steel Construction are specialized mechanical components exclusively engineered to connect, secure, and reinforce load-bearing steel elements in structural steel projects?such as steel-framed buildings, steel truss bridges, industrial steel workshops, steel transmission towers, and offshore steel platforms?with the core mission of ensuring the overall stability, load-bearing capacity, and long-term safety of the steel structure. Unlike general-purpose fasteners, they are designed to address the unique mechanical demands of steel-to-steel connections, including transferring static loads (e.g., the self-weight of steel beams and building floors), dynamic loads (e.g., wind-induced forces on high-rise steel buildings, seismic shocks on steel bridges), and cyclic stresses (e.g., vibration from industrial machinery in steel workshops). These fasteners are typically manufactured from high-performance structural steels or alloy steels that match the mechanical properties of structural steel (such as tensile strength, yield strength, and ductility), with common materials including ASTM A325/A490 alloy steel (for high-strength bolts), low-carbon steel (for structural nuts), and 316 stainless steel (for corrosion-prone environments like offshore steel structures).

The global Fasteners for Structural Steel Construction market size was estimated at USD 1972.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
