Abstracts

Pre-Applied Adhesives for Fasteners are adhesive coatings applied to the threads of bolts, screws, or nuts during manufacturing to improve their locking, sealing, and anti-vibration properties. These adhesives are typically activated during assembly, forming a strong bond that resists loosening caused by vibrations, temperature changes, or environmental factors. They eliminate the need for separate adhesive application, streamlining installation processes while ensuring consistent and reliable performance. Commonly used in automotive, aerospace, construction, and industrial applications, pre-applied adhesives enhance the durability and safety of threaded connections in critical environments.

The global Fasteners Pre-Applied Adhesives market size was estimated at USD 387.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.10% during the forecast period.
