## Abstracts

A faucet-mount water filtration system is a type of point-of-use (POU) water filtration system that is designed to be mounted directly onto a faucet. These systems are compact, convenient and affordable compared to other types of water filtration systems. They are also easy to install and maintain, typically requiring only a few minutes to set up. Faucet-mount water filtration systems typically use a combination of activated carbon filters and other filtration media to remove contaminants such as chlorine, sediment, and microorganisms.
