Abstracts

Nurses with a Licensed Practical Nurse (LPN) or Registered Nurse (RN) license provide private nursing services. These services are provided to patients on an individual basis by professionals. Because female nurses are more sensitive than male nurses and treat patients with greater care, they dominated the nursing care market. Female nurses are preferred by patients over male nurses for private nursing. Nurses with a Licensed Practical Nurse (LPN) or Registered Nurse (RN) license provide private nursing services. These services are provided to patients on an individual basis by professionals. The rising frequency of chronic illnesses and the rise in the number of nuclear families are expected to benefit the private nursing services market during the forecast period. People nowadays prefer to live in nuclear households, which is the fundamental reason for the increase in demand for private nursing services. Because female nurses are more sensitive than male nurses and treat patients with greater care, they dominated the nursing care market. Female nurses are preferred by patients over male nurses for private nursing. The female nursing care sub-segment is expected to drive the growth of the private nursing services market during the forecast period as demand for female nursing increases.

The global Female Private Nursing Services market size was estimated at USD 588.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.70% during the forecast period.
