Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Fiberglass Core Material competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Fiberglass Core Material production reached approximately 270,248 tons, with an average global market price of around US\$ 843.52 per ton. Fiberglass Core Material is a lightweight, porous insulation medium made from fine glass fibres, characterized by low thermal conductivity, high mechanical strength, non-combustibility, and chemical stability.

Upstream (Materials & Suppliers): Fiberglass Core Materials are primarily made from high-purity silica sand, boron compounds, alumina, and other glass-forming additives, which are processed into fine glass fibres. Key global suppliers of these raw materials include Saint-Gobain, 3M, Corning, Hitachi Chemical, and U.S. Silica, providing consistent quality and high-performance glass raw materials essential for producing insulation and structural cores. Additional upstream inputs include sizing agents, binders, and coating chemicals that enhance fibre handling and performance.

Downstream (Applications & End Users): The produced Fiberglass Core are used in vacuum insulation panels (VIPs), building insulation panels, and industrial thermal insulation systems. Major end users include appliance manufacturers (e.g., Haier, Midea), construction companies for energy-efficient buildings, and industrial/energy companies (e.g., Shell, Total, chemical plants), where the cores provide thermal insulation, structural support, and energy efficiency. These applications rely on the fibre cores' low thermal conductivity, high strength, and chemical stability.

The global Fiberglass Core Material market size was estimated at USD 228.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Fiberglass Core Material market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
