Report Overview

The fiberglass inflatable boats tend to have more underdeck space. For those who need ample storage and secure lockboxes, this is an excellent feature since these spaces do not have to be welded on to the vessel. Fiberglass has aesthetic options that aluminum vessel's struggle to compete with. The finishes are sleek and make maintenance and cleaning a little easier. Besides, fiberglass hulls have a smooth and quieter ride than their aluminum counterparts. The material is more forgiving and absorbs sound better than aluminum. It's a little more comfortable underfoot as it absorbs movement whereas aluminum tends to reflect movement which might make for a jolting ride.
