### Report Overview

Field Installable Connector is a kind of connector that is pre-polished in factory, which aims to offer users a fast, easy and reliable termination way. And if field installation connectors deployed in cable installation, the termination time will be less than two minutes without any difficulty and require no epoxy, polishing or crimping. That's why field installable connectors are so popular. The mechanical connector is a product that evolved primarily out of the enterprise space, and offers a simpler and cleaner alternative to the epoxy-and-polish connectors which preceded it. As its name implies, mechanical field installable connector uses a mechanical method to align a cleaved fiber with the pre-polished stub and then use a cam, wedge, or crimp mechanism to secure the fibers together. In essence, it is a connector end-face and a mechanical splice in one package and within a few millimeters distance of one another. And this kind of field installable connector can be used for both indoor and outdoor applications.
