The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Filament LED Bulb competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Filament LED Bulb is an incandescent lamp made of LED, which is manufactured according to the form of incandescent lamp, and can directly replace incandescent lamp. The advantages of LED filament lamp are very obvious: 1. Because the package device is full circumferential luminous type, the primary optical loss is small, so the light efficiency of LED filament lamp is high; 2, LED filament lamp filament itself is full circle luminescence, secondary optical light distribution cost is reduced; 3. The LED filament lamp relies on the gas to dissipate heat, so the metal plastic structure is changed to glass; 4, LED filament lamp can use HV circuit structure to achieve simple dimming function. The filament LED bulb market is primarily driven by increasing global awareness of energy efficiency and environmental sustainability, which has boosted demand for high-performance, low-energy lighting solutions among consumers and businesses. Compared to traditional incandescent and fluorescent bulbs, filament LED bulbs offer significant energy savings while providing a visually appealing retro design and high-quality light output, making them increasingly popular in residential, hospitality, dining, and commercial spaces. Continuous advancements in LED technology have enhanced brightness, lifespan, and color temperature performance, while reducing production costs, further improving their cost-effectiveness. Additionally, government energy-saving policies, efficiency standards, and regulations restricting high-energy-consuming lighting have created a supportive regulatory environment for market growth. Overall, rising energy-consciousness, technological improvements, aesthetic demand, and policy support are the key factors propelling the filament LED bulb market. Global Filament LED Bulb key players include Ledvance, Philips, GE, etc. Global top 3

manufacturers hold a share over 41%. China is the largest market, with a share about 36%, followed by North America, and Europe, both have a share about 34 percent. In terms of product, 40W is the largest segment, with a share over 47%. And in terms of application, the largest application is Restaurant, followed by Bar, Hotels & Resorts, Family, Cafe, Others.
