Abstracts

Financing leasing service is a financial model that achieves "financing" by "financing objects". It means that the lessor purchases the assets from the supplier based on the lessee's selection of equipment or assets, and then leases them to the lessee for long-term use. The lessee pays the rent on time and can choose to retain, renew or return the assets after the lease expires. This service, which combines financing and financing of goods, trade, and technology, is widely used in machinery and equipment, transportation, medical equipment, energy facilities, and other fields. It helps companies acquire key assets without tying up large amounts of capital, optimize their financial structure, and achieve technological upgrades and capacity expansion.

The global Financing Leasing Services market size was estimated at USD 1582232.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Financing Leasing Services market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.
