Abstracts

A fingertip pulse oximeter electronic tester can be placed on your fingertip to find out the oxygen level in your blood. They are especially useful for pilots or endurance athletes who work or train at high altitudes, where the risk of hypoxia increases. According to our research, the global market for medical devices is estimated at US\$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years. The global healthcare spending contributes to occupy 10% of the global GDP and is continuously rising in recent years due to the increasing health needs of the aging population, the growing prevalence of chronic and infectious diseases and the expansion of emerging markets. The medical devices market plays a significant role in the healthcare industry. The market is driven by several factors, including the increasing demand for advanced healthcare services globally, advancements in medical technology, growing geriatric population, rising healthcare expenditure, and increasing awareness about early disease diagnosis and treatment. In recent years, chronic respiratory diseases such as asthma, chronic obstructive pulmonary disease (COPD), lung cancer, cystic fibrosis, sleep apnea, and occupational lung disease have become leading causes of death worldwide. In addition, high- and middle-income countries are disproportionately affected by congenital heart disease and chronic obstructive pulmonary disease. According to the American Lung Association, approximately 12.5 million adults in the United States will be diagnosed with COPD in 2020. Oxygen saturation is an important parameter in COPD and other chronic respiratory diseases. An oximeter measures the oxygen saturation in arterial blood, or the percentage of hemoglobin saturated with oxygen, to diagnose COPD. Rising prevalence of coronary heart disease, chronic obstructive pulmonary disease, and other respiratory diseases among infants and geriatrics has increased the demand for various new products. Governments of various countries require continuous monitoring of oxygen saturation in patients with chronic respiratory diseases. Both developed and developing countries have implemented

government guidelines and recommendations for pulse measuring devices. Furthermore, the rise in oximeters for anesthesia monitoring during surgery in developed countries is also contributing to the growth of the market.

The global Fingertip Pulse Oximeter Electronic Testers market size was estimated at USD 2473.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
