In 2024, global Finish Foil Base Paper production reached approximately 2,016 K Tons, with an average global market price of around 1,882 USD per Ton. Finish foil base paper is a high-quality decorative base paper designed for producing finish foils used in furniture, flooring, and interior surface finishing. It is typically made from bleached chemical wood pulp and specially treated to achieve high smoothness, uniform porosity, and good resin absorption, allowing for excellent printing and impregnation performance. The primary upstream raw material for Finish Foil Base Paper is wood pulp. Major wood pulp producing countries worldwide include Brazil, Chile, Finland, Sweden, Russia, and Indonesia. Factors such as local production environments, climate conditions, and policy changes can impact global wood pulp prices. Major global wood pulp producers include Suzano, Fibria, CMPC, and UPM. Finish Foil Base Paper's downstream customers primarily include manufacturers of finish paper for furniture, flooring, and wooden doors. The single-line production capacity of Finish Foil Base Paper depends on the company's production line technology and product positioning, typically ranging from 50,000 to 100,000 tons per year. The product's gross profit margin is closely tied to price fluctuations and market competition for the raw materials wood pulp and titanium dioxide, typically ranging from 20% to 30%.
