Abstracts

Fire blocking materials are used to block various penetrating objects, such as various openings formed when cables, air pipes, oil pipes, and air pipes pass through walls (storage) walls, floor (A) slabs, and fire separation of cable trays, so as to avoid The fire spread through these openings and crevices. Global Firestop Material key players include 3M, HILTI, Rockwool, etc. Global top three manufacturers hold a share about 20%. China is the largest market, with a share over 40%, followed by Europe, and North America, both have a share over 30 percent. In terms of product, Inorganic Fireproof Material is the largest segment, with a share over 80%. And in terms of application, the largest application is Petrochemical, followed by Commercial Buildings, Communication, Electric Power, etc. The firestop material market is growing steadily, driven by increasing safety regulations and heightened awareness of fire prevention measures in construction and industrial sectors. Governments worldwide are enforcing stringent building codes to ensure fire safety in residential, commercial, and industrial structures, pushing the demand for firestop materials such as sealants, wraps, and boards. These materials are essential in maintaining the integrity of fire-rated walls, floors, and ceilings by preventing the spread of fire, smoke, and toxic gases through penetrations caused by pipes, cables, and ducts. As urbanization and infrastructure development rise globally, particularly in emerging economies, the need for fire-resistant construction materials is growing significantly. Technological advancements in firestop materials are further driving market growth. Manufacturers are developing innovative firestop products that not only provide superior fire resistance but also offer ease of installation, durability, and compliance with green building standards. For example, intumescent firestop materials, which expand when exposed to heat, are gaining popularity for their ability to provide enhanced protection in case of a fire. Additionally, the demand for firestop materials that cater to complex building designs and modern construction techniques is increasing, especially in high-rise buildings, airports, hospitals, and data centers, where

fire safety is critical.

The global Firestop Material market size was estimated at USD 2544.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
