## Abstracts

A fixed drone docking station is a permanent or semi-permanent ground-based infrastructure designed to autonomously receive, secure, recharge (or swap batteries for), and protect one or more unmanned aerial vehicles (UAVs) between missions. These stations enable continuous, remote, and unattended drone operations by serving as a home base where drones can land precisely, undergo necessary maintenance or data transfer, and prepare for subsequent flights without human intervention, thereby supporting applications such as persistent surveillance, infrastructure inspection, automated logistics, and emergency response in environments where manual deployment is impractical or inefficient.
