Fixed smart tool cabinets usually consist of a solid cabinet with multiple tool slots or tool racks for storing various knives and tools. These cabinets are usually made of high-strength materials to ensure safe storage of knives and to prevent theft and fire. The intelligent control system is the core of the fixed intelligent tool cabinet. Through the intelligent control system, the operator can monitor the storage location, quantity and status of the tools in real time. Intelligent control systems often feature touch screens or electronic displays that allow users to easily find and select the tools they need. Currently, typical products on the market include Hoffmann SE's GARANT series, Zoller's toolOrganizer, etc.
