Report Overview

Flake silver powder is used as the raw material of the back silver paste, which can reduce the cost of the silver paste while maintaining a low resistivity. However, due to the poor fluidity of the prepared silver paste, it cannot be used for the front silver paste with extremely fine grid lines. electrode.

Spherical silver powder has a high degree of sphericity, and the silver paste prepared from spherical silver powder has good fluidity and can pass through the positive electrode fine grid line better. The properties of spherical silver powder can meet the demand of positive silver paste for silver powder.
