Report Overview

Polycarbonate (PC) stands out as a remarkable thermoplastic material, characterized by its colorless and transparent nature, making it an ideal choice for various applications. As a widely used thermoplastic, PC boasts exceptional attributes such as lightness, durability, impact resistance, and high-temperature tolerance. Its versatility extends to excellent optical clarity and outstanding electrical insulation properties. Flame Retardant PC takes the inherent qualities of PC to the next level by incorporating flame retardancy. By combining with fire-retardant additives, we get a new type of PC plastic, which still retains its original excellent properties and has additional fire resistance.
