Abstracts

Flame retardant polyurethane potting adhesive is a polyurethane potting material with flame retardant properties. Polyurethane is a polymer material with good adhesion, chemical resistance, and heat resistance. Flame retardant polyurethane potting adhesive adds flame retardants to the polyurethane foundation, giving it flame retardant properties, which can slow down the speed of flame spread and reduce fire risk when encountering open flames or high temperatures. Flame retardant polyurethane potting adhesive is often used in the field of electronic appliances, for potting electronic components, connectors, circuit boards, etc., to provide protection and insulation effects. It has good heat resistance, chemical resistance, and electrical insulation performance, can be used in high-temperature environments, and can effectively isolate the invasion of moisture, dust, and other pollutants. At the same time, flame-retardant polyurethane potting adhesive also has good mechanical strength and impact resistance, which can protect electronic components from vibration and external impact. In short, flame-retardant polyurethane sealing adhesive is a polyurethane sealing material with flame retardant properties, commonly used in the field of electronics and electrical appliances, for protecting and insulating electronic components.

The global Flame Retardant Polyurethane Potting Compound market size was estimated at USD 385.5 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.25% during the forecast period.
