## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Flame-retardant PP Corrugated Pipe competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of flame-retardant PP corrugated pipes reached 380 million meters, with an average selling price of US\$0.92 per meter. Flame-retardant PP corrugated pipes are flexible protective pipes made from modified polypropylene (PP) as the base material. They possess excellent flame retardancy (UL94 V0 rating), heat resistance (-40° to 125°), and compressive strength (800N/5cm), and are mainly used in automotive wiring harness protection, electrical wiring, rail transportation, and industrial equipment wiring systems. Upstream raw materials include flame-retardant grade polypropylene resin, halogen-free flame retardants (such as aluminum hydroxide, phosphorus-nitrogen based), black masterbatch, and UV-resistant additives. Suppliers include BASF, SABIC, Mitsui Chemicals, LG Chem, and Clariant. Downstream applications are mainly concentrated in automotive manufacturing (45%), building electrical systems (30%), and rail transportation and industrial automation (25%). Major customers include Bosch, Toyota, ABB, and Siemens. Total production capacity is approximately 150 million meters per year, with an industry average gross profit margin of 22%–28%. In the upstream material costs, polypropylene accounts for approximately 55%, flame retardants and additives account for about 30%, and the remainder is energy consumption and packaging; downstream consumption is mainly for automotive cable harnesses and control line protection. Future development will focus on highly flexible, recyclable, and low-smoke halogen-free flame-retardant PP corrugated pipe products to meet the growing demands of new energy vehicles and smart grids.

The global Flame-retardant PP Corrugated Pipe market size was estimated at USD

350.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.10% during the forecast period.
