## Abstracts

Flash Loan Bots are automated programs that exploit the unique features of flash loans to execute a series of transactions within a single block on the blockchain. A flash loan is a type of uncollateralized loan that must be borrowed and repaid within the same transaction block. These loans are typically used in DeFi (Decentralized Finance) platforms like Aave, Uniswap, and Compound. Flash loan bots are automated tools that take advantage of this mechanism to perform complex operations, such as arbitrage, liquidation, or rebalancing, without the need for initial capital. The bot borrows funds, performs operations (like buying, selling, or interacting with DeFi protocols), and repays the loan all within the same transaction.

The global Flash Loan Bots Development market size was estimated at USD 64.5 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.50% during the forecast period.
