Report Overview

Flexible shaft couplings are used in applications that require high torque transmission in the oil and gas industry. Non-lubricated coupling types, such as diaphragm, elastomeric, bellow, and disc couplings, are mostly adopted in the oil and gas industry. Flexible shaft couplings provide a combined torque capacity with vibration damping in pump applications in pipelines and oil refineries. This type of flexible shaft coupling can withstand extreme temperatures, pressure, and humidity. As a result, the probability of damages in the equipment is very less, reducing the overall machine life cycle cost.
