Abstracts

Flexible Solar Cell is a kind of thin film solar cell. Flexible solar panels can, as their name suggests, flex. They are also very lightweight and these two characteristics make them useful for camping, rapid transport and deployment in emergencies, and for use on caravans, vehicles, and even airplanes. On buildings they can be applied to curved surfaces or structures where weight is an issue. As they can be glued directly to the surface, existing penetrations don't need to be used or new penetrations made. The Global flexible Solar cell market is dominated by Uni-Solar, Miasole, Global Solar, SoloPower Systems and Flisom, with the top five players accounting for about 70% of the market share. Uni-Solar has about 30 per cent of the market.

The global Flexible Solar Cell market size was estimated at USD 513.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.90% during the forecast period.
