Abstracts

Floor plan solutions are computer applications or online tools used to create and design floor plans of buildings, rooms, or entire space layouts. These programs allow users to represent physical spaces in two-dimensional (2D) or three-dimensional (3D) models. Its built-in drawing tools, such as pre-made floor plan examples and templates, and template libraries containing architectural-related vector templates, help build all the necessary architectural plans, building sketches and floor plans, high-rise building projects, and landscape designs. The global floor plan solution market is undergoing a critical period of intelligent transformation, with the core driving force coming from the global penetration of building information modeling (BIM) and the rigid demand for cloud collaboration. Europe and the United States have mandatory BIM filing requirements for new projects (BSI PAS 1192 standard in the UK), driving a surge in demand for software compatibility upgrades; in the post-epidemic era, 70% of design agencies use SaaS tools (such as Autodesk Revit Cloud), and real-time collaboration efficiency has increased by 300%. From a regional perspective, North America leads innovation. AutoDesk (market share 31%) launched the AI ??plug-in Forma, which increases the speed of solution generation by 40 times.

The global Floor Plan Solution market size was estimated at USD 96.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
