Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Flush Diaphragm Pressure Sensor competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of Flush Diaphragm Pressure Sensors reached 142 million units, with an average selling price of US\$5.60 per unit. Flush Diaphragm Pressure Sensors are pressure-sensing devices with a flat diaphragm structure. They accurately sense changes in liquid or gas pressure without cavities or stress concentrations. They are resistant to clogging, easy to clean, and corrosion-resistant, making them widely used in industries such as food and beverage, pharmaceuticals, bioengineering, chemicals, and wastewater treatment. Key upstream raw materials include 316L stainless steel diaphragms, silicon piezoresistive cores, conductive adhesives, ceramic substrates, and electronic packaging materials. Core suppliers include Kobelco, Henkel, Dow Chemical, CeramTec, and Rogers Corporation. Global production capacity is approximately 155 million units per year, with a single-line capacity of approximately 800,000 units per year. The industry's average gross profit margin is approximately 32%. Industrial automation accounts for approximately 40% of downstream consumption, process control systems 35%, and the food, pharmaceutical, and environmental protection sectors 25%. Among upstream materials, metal diaphragms and silicon cores together account for approximately 58% of manufacturing costs. In the future, flat-diaphragm pressure sensors will develop in the direction of intelligence, miniaturization, hygienic design, and high-temperature and corrosion resistance to meet the high reliability requirements of smart factories and clean process environments.

The global Flush Diaphragm Pressure Sensor market size was estimated at USD 795.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the forecast period.
