Fast Moving Consumer Goods (FMCG) packaging refers to the packaging used for products that have a high turnover rate and are sold quickly at relatively low cost. This type of packaging is designed to protect the products during transportation, storage, and display, while also serving as a marketing tool to attract consumers. FMCG packaging includes a wide range of materials such as plastics, paper, glass, and metal, and can take various forms such as bottles, cans, boxes, and pouches. The primary function of FMCG packaging is to ensure the safety and quality of the products, extend their shelf life, and provide convenience to consumers.

Additionally, advancements in technology are leading to the development of smart packaging solutions that offer features such as interactive labels, tamper-evident seals, and QR codes for product traceability and authentication.

Several market drivers are contributing to the growth of the FMCG packaging industry.
