Report Overview

Foldable stretchers are portable medical devices designed for the safe and efficient transport of patients in emergency situations, particularly in environments where space and mobility are constrained, such as ambulances, disaster zones, and military operations. These stretchers typically feature a lightweight yet durable frame, often made from aluminum or high-strength plastic, with a collapsible mechanism that allows for compact storage when not in use. They are equipped with carrying handles, safety straps, and sometimes wheels for smoother patient movement, catering to both medical professionals and first responders.
