Report Overview:

Food Grade Recycled PET (rPET) refers to recycled polyethylene terephthalate that is approved for direct contact with food and beverage products. PET is a commonly used plastic in food and beverage packaging due to its lightweight, transparency, and recyclability. rPET is produced by collecting and processing post-consumer PET bottles and containers, then transforming them into food-safe resin suitable for packaging applications.

To be considered food grade, the rPET undergoes a rigorous cleaning and purification process to remove any contaminants and ensure it meets the required safety and quality standards for food contact. The use of rPET in food packaging helps to reduce the environmental impact of plastic waste and promote a more sustainable packaging solution.
