Abstracts

Food water soluble bags are an innovative packaging solution designed to dissolve completely in water, providing a sustainable and convenient method for storing and preparing food items. Made from biodegradable materials such as polyvinyl alcohol (PVA), these bags are safe for direct food contact and dissolve without leaving any harmful residues. They are particularly useful for portion-controlled ingredients, pre-measured meal kits, and instant food products, allowing consumers to cook or use the contents without removing them from the bag. This reduces packaging waste and streamlines food preparation.
