Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Foot Kick Door Opening System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global foot kick door opening system production reached approximately 1609 k units, with an average global market price of around US\$ 860 per unit. Foot kick door opening system is a kind of non-contact intelligent door control device. It allows the user to automatically open the door with a simple motion of swinging his foot under the sensor, without touching the door handle with his hand or other part of his body. The annual production capacity of a single production line for foot kick door opening systems is typically 8,000-10,000 units, with a gross profit margin of around 28%. The downstream consumption of foot kick door opening systems is distributed as follows: industry 30%, commerce 70%. The core requirement of foot kick door opening system stems from the urgent pursuit of hygiene, convenience and intelligent operation in modern life, especially in the scene of two-handed holding or high hygiene requirements. Its core business opportunities lie in two directions: one is the upgrading and transformation oriented to the stock market, which can provide intelligent induction upgrade kits for the conventional doors of existing residential and commercial buildings, and convert ordinary doors into contactless intelligent doors. The second is the integration scheme oriented to the incremental market, which deeply cooperates with high-end smart door, anti-theft door manufacturers and overall cabinet brands, and takes the system as standard configuration or high-end option to enter the smart home and commercial space track. In addition, in the post-epidemic era, the emphasis on contactless facilities in public places has also brought a dual drive of policy and public perception to the technology. If companies can form breakthroughs in reliability, cost control and personalized design around core sensor technologies, and

provide B-end technology modules or C-end integrated products, they will be able to take advantage of this emerging market focused on experience.

The global Foot Kick Door Opening System market size was estimated at USD 1384.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
