The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Foot Pressure Measurement System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global PFoot Pressure Measurement System production reached approximately 86,798 units, with an average global market price of around US\$ 1896 per unit. The production capacity is about 87,000-88,000 units, the gross margin is 47%, The cost is US\$ 1,004. Foot Pressure Measurement Systems are specialized devices designed to capture and analyze the pressure distribution exerted by the feet during standing, walking, or running. These platforms typically consist of high-resolution sensor arrays (e.g., resistive, capacitive, or piezoelectric) that measure pressure values across the plantar surface in real time. Raw materials and components: Includes pressure sensors (piezoresistive, capacitive, or piezoelectric), microcontrollers, data acquisition modules, display units, cabling, and wearable insoles or mats. Sensor manufacturers, electronic component suppliers, PCB producers, and materials suppliers for insoles or mats provide the essential components for system assembly. Assemble sensors, electronics, and software into a complete plantar pressure measurement system. Processes include sensor calibration, system integration, software development, and testing for accuracy and reliability. Used in clinical diagnostics (podiatry, orthopedics), rehabilitation, sports science, gait analysis, and footwear research. Hospitals, rehabilitation centers, sports laboratories, universities, and footwear manufacturers use these systems to analyze foot pressure distribution, improve patient care, or optimize footwear design.

The global Foot Pressure Measurement System market size was estimated at USD 165.0 million in 2025 and is projected to grow at a compound annual growth rate
