The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on ??Forged Steel Split Body Ball Valve? competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Forged steel split-body ball valves are a type of ball valve made from forged steel materials, with the valve body divided into multiple parts (usually upper and lower parts). This type of valve features a compact structure, excellent sealing performance, high pressure resistance, strong corrosion resistance, and a long service life. It can ensure reliability and safety under harsh conditions such as high temperature and high pressure, and is widely used in pipeline systems in industries such as oil, natural gas, chemical engineering, and power for controlling and regulating fluid flow. Its split-body design facilitates installation, maintenance, and repair, and can adapt to different pipeline connection requirements and working conditions.

The global ??Forged Steel Split Body Ball Valve? market size was estimated at USD 228.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the forecast period.
