Report Overview

Form-fill-seal machines are machines that form the package, fill it with a wet or dry product and seal it closed. Most FFS systems use flexible film to form the primary package, such as a bag or pouch. But gable-top and aseptic cartons are also created in a form-fill-seal operation. And most blister packs are produced with a thermoform/fill/seal machine, a close cousin. Form fill and sealing equipment are used in the packaging of F&B, pharmaceuticals, chemicals, and consumer products. Each FFS machine forms the packaging material from a roll or a stack. Then the formed packaging material is filled and sealed.

The global Form Fill and Seal Machines market size was estimated at USD 3903.90 million in 2023 and is projected to reach USD 5367.06 million by 2032, exhibiting a CAGR of 3.60% during the forecast period.

North America Form Fill and Seal Machines market size was estimated at USD 1080.99 million in 2023, at a CAGR of 3.09% during the forecast period of 2024 through 2032.
