Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Four-roll Reversible Cold Rolling Mill competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of four-roll reversible cold rolling mills reached 1,250 units, with an average selling price of US\$1.75 million per unit. A four-roll reversible cold rolling mill is a high-precision device used to further roll hot-rolled metal strips into thinner sheets. It features reversible operation, high thickness control accuracy, and stable sheet shape, and is widely used in the processing of stainless steel, aluminum, copper, and silicon steel. The equipment typically consists of work rolls, support rolls, a hydraulic AGC system, a main drive system, and an automation control unit. Upstream raw materials mainly include high-strength alloy steel, bearing steel, hydraulic system components, and electrical control modules. Major suppliers include JFE Steel, SKF, Bosch Rexroth, and Siemens. Downstream customers include plate manufacturers such as Baosteel, Ansteel, Nucor Steel, and POSCO. Total capacity is approximately 1,400 units per year, with an industry average gross profit margin of 22%~28%. Stainless steel and silicon steel cold rolling account for over 65% of downstream consumption, while alloy steel and hydraulic/electrical control systems account for approximately 70% of upstream material costs. In the future, with the increasing demand for high-strength thin plates from the new energy vehicle, energy storage and home appliance industries, four-roll reversible cold rolling mills will continue to upgrade towards intelligent control, high-precision rolling and energy-saving structures.

The global Four-roll Reversible Cold Rolling Mill market size was estimated at USD 2188.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 5.10% during the forecast period.
