Report Overview

Frac plugs serve as check valves to provide wellbore zonal isolation in multistage stimulation treatments. They isolate the lower zone during stimulation but allow flow from below to aid in well cleanup once the stimulation is over.

The global Frac Plugs market size is projected to reach US\$ 864.42 Million by 2028, from US\$ 483.11 million in 2021, at a CAGR of 9.09% during 2022-2028. Compared to conventional frac plugs, the composite frac plug is light and has shorter pump downtime, and the dissolvable frac plugs eliminates cost and grinding time, facilitates debris removal without downhole assembly problems, reduces well complexity, eliminates coiled tubing in operation, and reduces backflow challenges. Coupled with the recovery of oil & gas exploration activities, the Frac Plugs market is expected to achieve rapid growth.

Segment by Type, the Frac Plugs can be split into Composite, Dissolvable, etc. Composite frac plug is specially designed and manufactured using composite materials such as epoxy materials, thermoplastic, and resins. Magnesium alloy and polyglycolic acid are the main raw materials for dissolvable frac plugs. In 2021, Dissolvable Plugs have taken the major market share, accounting for 63.96% of the total market share, compared to 36.04% for Composite Plugs. During the forecast period of 2021-2028, the market size of Dissolvable Plugs will continue to maintain rapid growth, achieving a CAGR of 10.05%, while Composite Plugs will also maintain a CAGR of 7.23%.

The COVID-19 pandemic has significantly impacted the oil & gas sector. Oil prices have been declining due to failed agreements. Demand for refined products is also declining

due to industrial slowdowns and travel restrictions. Large oil & gas companies are reducing capital and operational expenditures. Moreover, the supply chain of raw material is highly disrupted. This is expected to hamper the demand for frac plugs.

According to the application, the Frac Plugs market can be divided into Horizontal Well and Vertical Well. In 2021, Horizontal Well will occupy the vast majority of the market share, reaching 91.46% of the total market share, while Vertical Well will account for 8.54%. It is expected that during the forecast period of 2022-2028, the market size of Horizontal Well will still grow rapidly at a CAGR of 9.73%, while the market size of Vertical Well has a high probability of recession at a CAGR of -1.42%.

Various Frac Plugs companies are focusing on organic growth strategies such as product launches, product approvals and others such as patents and events. Inorganic growth strategies activities witnessed in the market were acquisitions, and partnership & collaborations. These activities have paved way for the expansion of business and customer base of market players.

Based on region, the global composite frac plug market can be segmented into five regions: North America, Europe, Asia Pacific, South America, and Middle East & Africa. North America dominated the global composite frac plug market in 2021. The trend is projected to continue during the forecast period owing to the presence of ample unconventional reservoirs in the region. Furthermore, a large number of crude oil and natural gas oils are present in the region.

Major companies operating in the global composite frac plug market include Schlumberger, Halliburton, Nine Energy Service, WellBoss, CNPC, Sinopec, Forum Energy Technologies, NOV Inc., Pyramid Oil Tools, Weatherford, Innovex Inc., KLX Energy Services, Peak Completion Technologies, Inc., Expro.
