Report Overview:

Compared with ordinary shower gels, essences are mostly added to scented shower gels. This type of shower gel has a better skin care effect, and it can last for a long time. Fragranced shower gel also has antiseptic and anti-inflammatory effects, but for friends with sensitive skin, you should try a small amount of it when using the scented shower gel for the first time, so as to avoid allergic reactions. Some women are very sensitive during breastfeeding, and it is not suitable to use fragrance shower gel in this case.
