Abstracts

Free floating carsharing, also known as flexible or stationless carsharing, is a mobility service model that allows users to locate, reserve, and unlock vehicles via a smartphone app, use them for short-term rentals typically billed by the minute or hour, and return them anywhere within a designated operational zone rather than at fixed stations; this model eliminates the need for advance booking or returning vehicles to specific locations, offering greater spontaneity and convenience compared to traditional car rental or station-based carsharing systems, while relying heavily on GPS technology, automated billing, and real-time fleet management to optimize vehicle distribution and user accessibility.

The global Free Floating Carsharing market size was estimated at USD 1568.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 12.45% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Free Floating Carsharing market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
