## Abstracts

A High Pressure Discharge Ozone Generation System is a device that produces ozone (O<sub>3</sub>) using a high-voltage electrical discharge. Ozone is a molecule made up of three oxygen atoms and is a powerful oxidizing agent. Ozone generators are used in various industrial and commercial applications for air and water purification, odor control, and disinfection. An Frequency Ozone Generation System is a device that produces ozone (O<sub>3</sub>), a molecule composed of three oxygen atoms. Ozone is a powerful oxidizing agent and is often used for various applications such as air and water purification, odor control, disinfection, and in some medical treatments. In some ozone generation system, electrical frequencies might be used to control the production or release of ozone.
