Abstracts

Frozen beverage machines are commercial or consumer-grade appliances designed to produce and dispense chilled, slushy, or semi-frozen drinks, typically through a continuous freezing and mixing process that combines liquid concentrates or syrups with water and freezes the mixture to a specific viscosity. These machines are widely used in food service establishments such as convenience stores, movie theaters, amusement parks, and quick-service restaurants, as well as in settings like offices or homes for personal use, with key product variations including countertop units, free-standing models, and those integrated into beverage dispensers.
